

DEFINITIONS

- ☑ **Supply:** The cost of supplying electricity for your usage.
- ☑ **Delivery:** The cost of delivering electricity to your home through the power lines.
- ☑ **Solar Credits:** Financial incentives created as part of community solar programs to encourage people to use clean energy and lower their carbon footprint.

HOW DO SOLAR CREDITS WORK?

Here's how solar credits work for community solar:

You subscribe to a Nautilus Community Solar farm in your area.

Nautilus will calculate your share of the total energy your farm is expected to produce over the next 12 months.

Based on your share, you earn a solar energy credit for electricity that your community solar farm produces.

These solar credits are then calculated into a dollar value which appears on your monthly Nautilus bills minus a discount of 10%.

It's important to note that the solar credits you earn are based on your share of the energy **produced** not the total energy **used** at home. This does not affect the amount of electricity delivered to your home. You will always receive the right amount you need.

HOW IS MY SHARE OF THE COMMUNITY SOLAR FARM CALCULATED?

Your share or "allocation" is calculated by:

$$\frac{\text{YOUR 12-MONTH HISTORICAL USAGE}}{\text{AVG ANNUAL COMMUNITY SOLAR FARM PRODUCTION}} = \text{YOUR ALLOCATION \%}$$

From here, we can calculate your monthly solar credits:

$$\text{YOUR ALLOCATION \%} \times \text{TOTAL ENERGY PRODUCED THAT MONTH} = \text{YOUR SOLAR CREDITS}$$
